

CORNER STAIR SAFETY POSTS

Steel posts provide secure support for temporary edge protection to staircases and landings during construction

Engineered stair safety post for corners with a total of 6 cleats (3 on each adjacent side of the post) to enable the timbers to form a corner section

Easy to fix and suitable for wood, concrete and steel staircases

Manufactured from 40 x 40 RHS powder coated high visibility yellow

Base fixings to have a minimum pull out resistance of 1.40 KN (each)

Base plate with pre-drilled holes for easy fixing down

Post centres to be a maximum of 2m utilising a 44 x 144 C16 Timber, any joints should be half lapped at the post positions
