

# SALT SPREADER

Paddocks, lawns and driveways are all taken care of with the trailed spreader range. With a choice of two sizes of hopper capacity, these spreaders are perfect for use behind ATV's and road vehicles. An agitator in the hopper improves material flow while the optional winter kit is invaluable for accurate spreading of free-flowing granular salt.

Spinning disc spreader which is mechanically driven via pneumatic-tyred wheels

Stainless steel spinning disc for durability with 14m spread distance

The salt spreader versions include the following:

Spread Limiter – Typically used in winter maintenance applications for spreading salt on pathways, the spread limiter restricts the application width to approximately 1.5m

Extended Agitator – Keeps material moving within the hopper

Filtering Grid – Breaks up lumps of salt before entering the hopper
